Hidden Hills Barndominium

Priced From

$276,990

3 Exterior Styles Available

- **1,568+ Sq. Ft.**
- **3 Bedrooms**
- **2 Bathrooms**

The Hidden Hills is a charming barndominium design that combines cozy living with modern convenience. With 1,568 square feet of heated space, this design features an open-concept layout that seamlessly connects the family room, kitchen, and dining area. It's a perfect setup for both everyday living and hosting gatherings with loved ones. The home portion of this barndominium is part of our Design By U series, meaning that the home's home plan can be easily modified with additional bedrooms and bathrooms, depending on you and your family's needs. This thoughtfully crafted plan also offers flexible options for attached garages, so you can customize the home to fit your needs. These are designed as 14' x 34' so more of a traditional garage, but with plenty of space. This particular plan has 10' doors on each side. The flexibility of this plan is also evident in many ways, not only can the home itself be essentially "whatever you want", the side garages can be removed for just a simple Farmhouse, or you could choose one on the left side of the home and convert the right side to an inviting porch, or even consider an In-Law Suite? The functionality and choices are endless. The inviting front porch adds a warm, welcoming touch, making it easy to imagine relaxing evenings and quality time spent outdoors. The Hidden Hills is more than a house—it's a place to call home. Home plan photo may showcase choice flooring options.

All square footage is approximate. Renderings are artist's conceptions and may vary slightly from the actual home. Homes may be built in reverse of plans shown, depending on site conditions. Minor architectural changes may be made occasionally at the option of the builder. Please contact your Sales Consultant for details.
